Art Unit: 2818

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a structure of dual level memory cell, classified in class 257; subclass 316.
- Claims 14-19, drawn to a method of fabricating a dual level memory cell, classified in class 438, subclass 257.
- III. Claims 20-22, drawn to a method of programming a dual level memory cell, classified in class 365, subclass 185.28.
- IV. Claims 23-24, drawn to a method of erasing a dual level memory cell, classified in class 365, subclass 185.29.
- V. Claims 25-26, drawn to a method of reading a dual level memory cell,classified in class 365, subclass 185.21

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the memory cell as claimed can be made by different processes. The diffusion regions, for example, can be formed by implantation or diffusion.
- 3. Inventions I, III, IV and V are related as product and process of use including: programming, erasing and reading of dual level memory cells. The inventions can be

Application/Control Number: 10/634,042

Art Unit: 2818

shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case there are different ways of using a memory cell as classified in class 365, subclasses 185.28, 185.29 and 185.21.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III or IV or V and vice versa, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Son L. Mai whose telephone number is 571-272-1786.

The examiner can normally be reached on 8am to 6pm.

Application/Control Number: 10/634,042
